Clients' reviews on PWSK "Tool Control System" program:

"According to our assessment, "Tool Control System" of PWSK is the best program our company encountered, analysing advantages of various other programs available on the market."

"In every-day work the program simplifies the use of tools and makes it quicker."

*"We recommend the PWSK Company as a reliable supplier of the "Tool Control System" program.*

"We specifically chose "Tool Control System", because it has all functions necessary when running the tool warehouse, and at the same time it is very clear and easy to use."

"Tool Control System" brings immediate and measurable benefits to the company, and the license pays for itself after a few months of use.

The rewards from implementing the "Tool Control System "software:

- shortening the time of the employee's service
- quick rotation of tools
- lowering the storage and decrease in purchasing
- lower usage, e.g. of protective gloves by 50%
- controlling the employees and lowering theft
- reporting and analysis.

"Tool Conrol System v.3.0" and **PWSK "Mobile Tool Control"** thanks to their quality and popularity were awarded the title of the **Product of the Year 2013**.

PWSK Tool Control System manages over

1 000 000

tools in Poland

How it works?

Use of software is simple and intuitive!

1. Establishing (or importing) tool inventory
2. Marking the equipment with a barcode or RFID tags
3. Inventory within the warehouse and at the employees
4. Control of issuing and returns:
   - Individually – using barcode scanners and mobile terminals devices
   - Everything at once – using the RFID tags readers
5. Control of the maintenance & calibration dates
6. Minimum levels supervision
7. Reporting and analysis
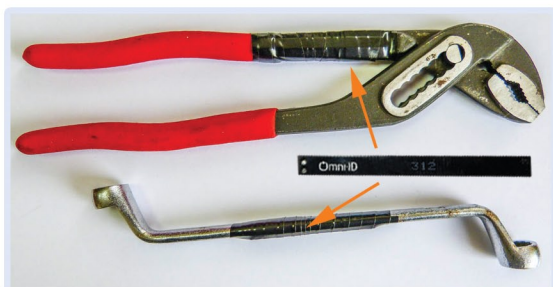

Marking tools using the barcode

Marking with a barcode

Quick issuance using the data collector
and the program PWSK Mobile Tool Control

Marking tools using RFID UHF tag

Permanent marking with RFID UHF tag

Checkouts of tools marked
with hidden RFID tags

Identification of employees and authorisation of operation using the RFID cards

- Immediate search of a person in the database
  – avoidance of mistakes (e.g. similar surnames)
- Electronic authorisation of transaction
  (not necessary to print paper confirmations)
- Use of the same identification cards
  to register working times (RCP)

Quick and reliable confirmation of operation
by the employee using the proximity card

PWSK Mobile Tool Control Program for mobile devices

- Innovation, ergonomics and convenience
- Quick operation using barcodes and RFID
- Zero mistakes
- Inventory
- Purchasing, issuance and returns
- Prices and levels check
- Identification of employees using RFID cards
- Identification of items using RFID UHF tags
  or barcode

Minimum system requirements: 1GHz processor, 2 GB RAM, OS: Windows XP, Vista, 7, 8 (32 – 64 bit), network server Linux or Windows SQL Firebird 2,5.
