quick Inventory

Learn more about Quick Inventory

3 easy steps of Quick Inventory

- ✓ Carry out inventory even 10 times faster
- ✓ Permanently mark and secure your assets
- ✓ Accounting and Board will receive all required tallies and printouts

Inventory takes up too much time? Use a proven method, software and hardware.

We've been annoyed that the traditional inventory methods take forever and we've decided to come up with a brand new method.

After dismantling the whole inventory process we've developed an efficient solution.

The system has been successfully employed to inventory 4500 assets in a 7-story office building, 1000 industrial machines in a food factory and 2000 locations of a large research & development plant.

1

Create new entries or import data from Excel, ERP.

2

Mark your assets.

3

Perform physical stock-taking, that thanks to the mobile readers will become a pleasant experience.

Inventory using barcode

To mark assets we use exclusively labels that are resistant to washing, breakage and external factors. In heavy industry, we employ metal barcode nameplates.

Thanks to that marking an asset once will suffice for its entire lifetime.

What benefits does inventory using RFID provide?

- ✓ Durability – the most durable solution available on market. You can hide the RFID chip inside the device.
- ✓ Convenience – you don't have to bend under the desk to locate and read the chip.
- ✓ Saving time – instant-read saves the invaluable time.
- ✓ Security – identifiers can't be counterfeited and provide a great anti-theft measure.

Marking assets with RFID labels

Self-adhesive label merged with an RFID chip

Mobile physical stock-taking

Properly matched mobile devices are the key to the efficiency of Quick Inventory. They allow for instantaneous barcode reading and RFID chip scanning.

The reliable memory of a mobile reader stores thousands of entries. Nothing will escape you anymore.

Automated inventory of assets with the use of a long-range mobile RFID chip scanner. Work in a convenient and timely manner.
